Ethics In Social Science Research In Indonesia Dec 30 2019 "There are not many books on ethics that are currently available, especially in Indonesia. This book comes to fill that gap. A commendable book that researchers should read, especially when there is more and more research on human behavior. It is a stupendous work." M. Chatib Basri, Executive Director, IBER Minister of Finance of the Republic of Indonesia 2013-2014 " This book addresses an important set of issues in the context of Indonesia, a large developing country in Southeast Asia. Most work on research ethics has originated in the developed world; the strength of this book is that it relates the large international literature to the specific problems which Indonesian researchers are likely to face, especially in the social sciences. It deserves a wide readership both in Indonesia and in other parts of the world. " Anne Booth, Professor Emeritus, SOAS, University of London "In a world full of fake news, corrupt bureaucracies, and inequitable judgements it is vital that the training of rising generations of social scientists contains thorough grounding in ethics. This volume should be required reading in all teaching programs, and a valuable addition on the desk of all graduates wishing to pursue a career in the social research professions. " Terence H. Hull, Emeritus Professor of Demography, The Australian National University " Reading this book is an eye-opening experience. Mayling Oey Gardiner presents novelty by discussing ethics in social science research on current issues such as big data, internet-based research, and environmental research. This book can guide academics and decision-makers to define boundaries and consider the impact of social research. " Rhenald Kasali Ph.D, Founder Rumah Perubahan Professor of Management, University of Indonesia [Advanced Machining Processes](#) Jan 11 2021 Advanced machining processes has significant contributions to the manufacturing industries, especially since many new invented materials have advanced properties, which are difficult to machine using conventional machining processes. Chapter 1 explains the electrochemical machining (ECM), includes process parameters that involved in the ECM processes. Chapter 2 deals with another advanced machining process, i.e. electro-discharge machining (EDM). Several process parameters that contribute to the EDM processes are also discussed. Electrical dressing is described in Chapter 3 as a special application of ECM and EDM. Finally, other types of non-conventional machining are explained in Chapter 4. History and Social Theory Apr 25 2022 What is the use of social theory to historians, and of history to social theorists? In clear and energetic prose, a pre-eminent cultural historian here offers a far-reaching response to these deceptively simple questions. In this classic text, now revised and updated in its second edition, Peter Burke reviews afresh the relationship between the fields of history and the social sciences and their tentative convergence in recent decades. Burke first examines what uses historians have made - or might make - of the models, methods, and concepts of the social sciences, and then analyzes some of the intellectual conflicts, such as the opposition between structure and human agency, which are at the heart of the tension between history and social theory. Throughout, he draws from a broad range of cultures and periods to illustrate how history, in turn, has been used to create and validate social theories. This new edition brings the book up to date with the addition of examples and discussions of new topics such as social capital, globalization and post-colonialism. The second edition of History and Social Theory will continue to stimulate both students and scholars across a range of disciplines with its challenging assessment of the roles of history and social science today.

From Jail to Jail Jul 17 2021 "From Jail to Jail" is the political autobiography of a central though enigmatic figure of the Indonesian Revolution. Variousy labeled a communist, Trotskyite, and nationalist, Tan Malaka managed, during the several decades of his political activity, to run afoul of nearly every political group and faction involved in the Indonesian struggle for independence. He was elected Chairman of the Indonesian Communist Party (PKI) in 1921 and barely five years later opposed the PKI-led uprising in Indonesia. He openly opposed Sukarno s support for negotiations with the Dutch, yet Sukarno issued a decree in 1963 recognizing Tan Malaka as a hero of national independence. During his several decades of political activity he spent periods of exile and hiding in nearly every country in Southeast Asia. From Jail to Jail is one of the few known autobiographies by an Asian Marxist of the 1930 s and 1940 s."

Architecture and Identity Aug 25 2019 This book brings together complex fields of knowledge and globally splintered discourses on a subject that is experienced not only by scholars, but in the everyday lives of people around the world. There is a common complaint about the loss of identity which, to a substantial degree, is being associated with the built environment in cities and specifically with their architecture. "Architecture and Identity" takes a global, multidisciplinary look on how identities in contemporary architecture are constructed. The general hypothesis underlying this book is that in a globalized world identity in architecture cannot be easily derived from distinct indigenous patterns. The book presents forty contributions from various disciplines aiming to destroy the myth of an inheritable or otherwise prefabricated identity. Some authors dismantle constructs of identity that have long been considered as "solid" and unbreakable while others meticulously unravel the "construction" process of identities in

England's Leonardo Jul 05 2020 All physicists are familiar with Hooke's law of springs, but few will know of his theory of combustion, that his Micrographia was the first book on microscopy, that his astronomical observations were some of the best seen at the time, that he contributed to the knowledge of respiration, insect flight and the properties of gases, that his work on

gravitation preceded that of Newton's, that he invented the universal joint, and that he was an architect of distinction and a surveyor for the City of London after the Great Fire. England's Leonardo is a biography of Hooke covering all aspects of his work, from his early life on the Isle of Wight through his time at Oxford University, where he became part of a group who would form the original Fellowship of the Royal Society. The author adopts a novel approach at this stage, dividing the book by chapter according to the fields of research-Physiology, Engineering, Microscopy, Astronomy, Geology, and Optics-in which Hooke applied himself. The book concludes with a chapter considering the legacy of Hooke and his impact on science.

History of Economic Analysis Oct 27 2019 At the time of his death in 1950, Joseph Schumpeter was working on his monumental History of Economic Analysis. Unprecedented in scope, the book was to provide a complete history of economic theory from Ancient Greece to the end of the second world war. A major contribution to the history of ideas as well as to economics, History of Economic Analysis rapidly gained a reputation as a unique and classic work. As well being an economist, Schumpeter was a gifted mathematician, historian, philosopher and psychologist and this is reflected in the multi-disciplinary nature of his great endeavour. Topics addressed include the techniques of economic analysis, contemporaneous developments in other sciences and the sociology of economics. This inclusiveness extends to the periods and individuals who figure in the book. As well as dealing with all of the major economists from Adam Smith to Maynard Keynes, the book considers the economic writings of Plato and Aristotle, of the Medieval Scholastics and of the major European economists. Throughout, Schumpeter perceived economics as a human science and this is reflected in a volume which is lucid and insightful throughout.
