Online Newsgathering: Research and Reporting for Journalism Sep 26 2019 Journalists used to rely on their notepad and pen. Today, professional journalists rely on the computer-and not just for the writing. Much, if not all, of a journalist's research happens on a computer. If you are journalist of any kind, you need to know how to find the information you need online. This book will show you how to find declassified governmental files, statistics of all kinds, simple and complex search engines for small and large data gathering, and directories of subject experts. This book is for the many journalists around the world who didn't attend a formal journalism school before going to work, those journalists who were educated before online research became mainstream, and for any student studying journalism today. It will teach you how to use the Internet wisely, efficiently and comprehensively so that you will always have your facts straight and fast. Online Newsgathering . reflects the most current thinking . is pertinent to both industry and education . focuses on what people need to know Please visit the authors' companion website at <http://computerassistedreporting.com> for additional resources.

Space Wars Sep 06 2020 Michael J. Coumatos is a former U.S. Navy test pilot, ship's captain, and commodore; U.S. Space Command director of wargaming; and a government counterterrorism advisor. William Scott is a retired bureau chief of Aviation Week and Space Technology and a nine-year Air force veteran who served as aircrew on nuclear sampling missions. He is a six-time Royal Aeronautical Society "Journalist of the Year" finalist, and won the Society's 1998 Lockheed Martin Award for the "Best Defense Submission." He also received both the 2006 and 2007 Messier-Dowty awards for "Best Airshow Submission." With the help of New York Times bestselling author William J. Birnes, these renowned experts have joined forces to grippingly depict how the first hours of World War III might play out in the year 2010. Coumatos, Scott, and Birnes take the reader inside U.S. Strategic Command, where top military commanders, space-company executives, and U.S. intelligence experts are conducting a DEADSATS II wargame, exploring how the loss of critical satellites could lead to nuclear war. The players don't know that the war they are gaming has already begun, miles above them in the lifeless, silent cold of space. Jam-packed with the actual systems and secret technologies the United States has or will soon field to protect its space assets, Space Wars describes a near-future nuclear nightmare that terrorists will relish but politicians prefer to ignore. In a quieter, more peaceful time, Space Wars would be an exciting work of fiction. But with the United States now at war, Space Wars is all too real. . At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

ASEAN Corporate Governance Scorecard Aug 25 2019 Corporate governance principles provide guidance on how corporations should operate. Adoption of international corporate governance best practices leads to long-term sustainability and resilience, and can be a competitive tool to attract foreign investments. The Asian Development Bank, in partnership with the ASEAN Capital Markets Forum, have jointly developed the ASEAN Corporate Governance Scorecard, an assessment based on publicly available information and benchmarked against international best practices that encourage publicly listed companies to go beyond national legislative requirements. This report can be used by capital market regulators and other stakeholders as a reference to understand the current corporate governance standards across the region. It is also a useful diagnostic tool to guide improvement of corporate governance standards.

Space Mission Analysis and Design Dec 30 2019 With the second edition of Space Mission Analysis and Design, two changes have been introduced in the Space Technology Library. Foremost among these is the introduction of the Space Technology Series as a part of the Space Technology Library. Dr. Wiley Larson of the US Air Force Academy and University of Colorado, Colorado Springs, will serve as Managing Editor for the Space Technology Series. This series is a cooperative effort of the Department of Defense, National Aeronautics and Space Administration, Department of Energy, and European Space Agency, coordinated by the US Air Force Academy. The sponsors intend to bring a number of books into the series to improve the literature base in the fundamentals of space technology, beginning with the current volume. Books which are not a part of the Space Technology Series, but which also represent a substantial contribution to the space technology literature, will still be published in the Space Technology Library. As always, we welcome suggestions and contributions from the aerospace community.

Digital Marketplaces Unleashed Mar 01 2020 This collection of different views on how digitalization is influencing various industrial sectors addresses essential topics like big data and analytics, fintech and insurtech, cloud and mobility technologies, disruption and entrepreneurship. The technological advances of the 21st century have been massively impacted by the digital upheaval: there is no future without digitalization. The sale of products and services has left the classical point of sale and now takes place on a variety of channels. Whether in the automotive industry, travel and traffic, in cities, or the financial industry – newly designed ecosystems are being created everywhere; data is being generated and analyzed in real time; and companies are competing for mobile access channels to customers in order to gain knowledge about their individual contexts and preferences. In turn, customers can now publicly share their opinions, experiences and knowledge as User Generated Content, allowing them to impact the market and empowering them to build or destroy trust.

Photonic Waveguides Jul 05 2020 This book presents the principles of non-linear integrated optics. The first objective is to provide the reader with a thorough understanding of integrated optics so that they may be able to develop the theoretical and experimental tools to study and control the linear and non-linear optical properties of waveguides. The potential use of these structures can then be determined in order to realize integrated optical components for light modulation and generation. The theoretical models are accompanied by experimental tools and their setting in order to characterize the studied phenomenon. The passage from theory to practice makes the comprehension of the physical phenomena simple and didactic. The book also gives a presentation of the industrial applications of the integrated optical components. The studied topics range from the theory of waveguides and the linear and non-linear optical characterization techniques to photonic crystals. This last field constitutes a major challenge of photonic technologies of the 21st century.

Sejarah Satelit Palapa Indonesia Jilid IV Jan 03 2023 PATOK batas negara di daratan mudah dibikin. Batas laut yang memisahkan kedaulatan sebuah negara juga tak sukar diukur. Tapi slapa yang mempunyai kedaulatan di ruang angkasa? Persoalan itu menjadi penting terutama bagi Indonesia, karena selain memiliki satelit Palapa, Indonesia juga negara khatulistiwa yang memiliki sepercid lapan garis khatulistiwa. Padahal, di jalur orbit sekeliling bumi itu - sekitar 35.871 kilometer di atas khatulistiwa atau dikenal dengan Geostationer Orbit (GSO), kini terparkir ratusan satelit komunikasi, termasuk Palapa, tanpa aturan main yang jelas.

Manajemen Data Center End-to-End Mar 25 2022 Buku ini ditulis oleh mantan praktisi data center dan IT auditor suatu bank pemerintah. The Future of ASEAN Aug 18 2021 The Singapore Lecture Series was inaugurated in 1980 by the Institute of Southeast Asian Studies with a founding endowment from the Monetary Authority of Singapore (MAS), and augmented by a generous donation in 1983 from Exxon Mobil Asia Pacific. The Singapore Lecture is designed to provide the opportunity for distinguished statesmen, scholars, and writers and other similarly highly qualified individuals specializing in banking and commerce, international economics and finance and philosophical and world strategic affairs to visit Singapore. The presence of such eminent personalities will allow Singaporeans, especially the younger executive and decision-makers in both the public and private sectors, to have the benefit of exposure to - through the Lecture, televised discussions, and private consultations - leaders of thought and knowledge in various fields, thereby enabling them to widen their experience and perspectives. On 22 April 2014, the 34th Singapore Lecture was delivered by His Majesty Sultan Haji Hassanal Bolkiah Mu'izzaddin Waddaulah, Sultan and Yang Di-Pertuan of Brunei Darussalam, under the distinguished Chairmanship of Mr Teo Chee Hean, Deputy Prime Minister, Coordinating Minister for National Security and Minister for Home Affairs, Singapore.

Microstrip Antenna Design Handbook Jan 11 2021 Based on Bahl and Bhartia's popular 1980 classic, *Microstrip Antennas*, this all new book provides the detail antenna engineers and designers need to design any type of microstrip antenna. After addressing essential microchip antenna theory, the authors highlight current design and engineering practices, emphasizing the most pressing issues in this area, including broadbanding, circular polarization, and active microstrip antennas in particular. Special design challenges, ranging from dual polarization, high bandwidth, and surface wave mitigation, to choosing the proper substrate, and shaping an antenna to achieve desired results are all covered.

Corporate Transformation Jan 23 2022 by Professor Alessandro Sintra xi There are two categories which divide academic writing. The first category is made up of those which gather and systemize a developed thought, while the second is made up of those which detail a learning process which is presently occurring. This book belongs to the second category. It is intended to offer evidence of a still continuing research process which began three years ago. This research, undertaken simultaneously in Europe, the United States and Japan, has provided interesting evidence as to the conditions which must be present within a company in order to ensure continuous change. The object of our research has been to galvanize academics and managers into a debate which is especially relevant today: that of the ability of a company to anticipate or respond to changes which are occurring in its environment. Today more than ever, the ability to change culture and organizational structure are conditions which ensure a company's success, or more often, permit its survival. This book offers ten case studies about ten different large international firms, and about how they approached the problem of strategic change. In addition, there are ten articles which analyze the empirical evidence presented in the cases, and which try to provide and develop a general framework which can be used in a variety of situations. The cases represent an empirical base of reference. For the manager, they can serve as a source of benchmarking with the present situation of her/his company.
